## TECHNOLOGY ANALYST

Neopatents believes that everyone has the power to create. We believe that innovation must have positive impact to be important. We help our clients find worth and value from their inventions.

Neopatents only hires people who are smart, curious, creative, proactive, team players. We are looking for people excited about technology, patents, and innovation to join our Raleigh-based patent research and analytics consulting team.

The Technology Analyst role includes direct engagement with clients and their technology to develop strategic plans and maps of the patent landscape. You must have a strong technical mind, creativity, solid problem solving skills, and the ability to quickly learn new technologies. Strong technical writing skills are a must! And you must be curious to learn about new technologies and how they could be applied commercially. We will train you to use Neopatents' proprietary patent search and analysis software.

### **Responsibilities include:**

- Researching patent and technical data
- Analyzing trends and relationships in data
- Collaborating with clients and other analysts
- Presenting findings in written reports and oral presentations

### **Required Background:**

You must have a strong technical background in an engineering or scientific discipline; advanced degree preferred but not required. Experience with patents and new technologies is a plus.

Neopatents offers a fun and flexible environment with work hours on a per project, part-time, or full-time basis. Compensation depends on experience.

If interested, please send your resume and explain why you are perfect for this role on our team. Email [jobs@neopatents.com](mailto:jobs@neopatents.com) and reference this job title. No phone calls please.

Thank you!
